# An Historic Environment Record Search for Wickhamford Parish

This document contains your Historic Environment Record search for Wickhamford Parish. The following pages will provide an overview of our service alongside an explanation of the documentation included and guidance on its use. This is followed by an archaeological summary for your search area including a list of statutory designations, historic and modern mapping including the HER records, and finally the reports from individual records.

The Worcestershire **Historic Environment Record** (HER) is the largest collection of archaeological information in the County with details of over 26,000 sites, buildings, finds, and landscapes alongside information on past archaeological research and investigations. These records hold information on a vast and diverse array of archaeological remains, from Iron Age Hillforts to Second World War pillboxes. The HER is held in a database linked to a Geographical Information System (GIS), a computer mapping system designed to allow users to collect, manage and analyse large volumes of spatially referenced data. When you request information from us we carry out a search around a grid reference supplied by you, withdrawing all the records within that area from the database and allowing us to produce reports and mapping which fulfil your requirements. Our standard search radius is 500m from your specified location; however, we are able to undertake searches of more defined extents if requested. We are also able to provide information for records of particular types or dates such as a search for Neolithic enclosures.

The Historic Environment Record can be an ideal starting point if you are interested in researching your local area or a particular period of Worcestershire's past. While we can provide reports in digital format or by post, we encourage you to visit us in person to examine the large quantities of additional information stored in our offices, including banks of filing cabinets with detailed information on thousands of sites, and hundreds of aerial photographs covering large swathes of the county. In addition, the service has a reference library with general and specialist texts on British archaeology alongside an online collection of archaeological reports regarding Worcestershire's heritage accessible at [www.worcestershire.gov.uk/archaeology/library](http://www.worcestershire.gov.uk/archaeology/library). Finally, many of the archaeologists working at our offices are very knowledgeable about particular places, or are specialists in certain subjects or periods and are keen to help independent researchers.

The potential value of our records to your research may not however be restricted to an initial assessment of a particular area. We believe an appreciation of the historic form of landscapes is vital to understanding the people that occupied them; allowing us to contextualise and therefore improve our understanding of past activity. Our records and historic mapping can be used to understand these historic environments providing either fresh perspectives upon people and places identified through documentary research, or reconstructing historic landscapes to be populated through further research. We therefore strongly recommend consulting our archive service if you have not already done so on 01905 766 351 or [RecordOffice@worcestershire.gov.uk](mailto:RecordOffice@worcestershire.gov.uk).

If you require additional information or assistance we encourage you to contact or visit us at The Hive. Many of our records are also now available online with the Heritage Gateway at [www.heritagegateway.org.uk](http://www.heritagegateway.org.uk).

**We would be extremely grateful to receive new information that may emerge during the course of your research in order for us to continue improving the scope, quality and reliability of Worcestershire's Historic Environment Record.**

# The HER Data and Documentation

This document contains two types of report:

**The Single Line or Short Report** – this provides the basic information: the WSM Number, the Name/Title of the Record, the monument type, the date range and finally the National Grid Reference (the WSM number is the unique number given to each record within the HER).

**The Full Report** – this provides the above information **plus** a more detailed description of the monument/site/find/fieldwork etc. It also contains the sources and references that the record is based upon and gives its relationship (if any) to other associated sites. A ‘full’ report is not definitive and all sources mentioned should be consulted to gain a full understanding of the record. Each source has a unique SWR number which can be used to locate it within our offices or within our online library [www.worcestershire.gov.uk/archaeology/library](http://www.worcestershire.gov.uk/archaeology/library) if available.

This report also contains maps of the locations of the HER records. There are three forms of mapping available:

## Modern Maps with HER Records

The maps will show the location of all the sites in the report, labelled with the WSM number. **Please note:** The labels only give the approximate location of the sites and monuments. The reason for this is that if there is more than one record for a location or there are lots of sites in close proximity – i.e. on a street of historic houses – then the labels overlies each other and cannot be read. We, therefore, move or adjust the labels very slightly to make them easier to see. To get the precise location you must use the grid reference. The HER is set up with a number of themes or layers. Each theme contains a different type of record e.g. Historic Buildings or Excavations. This allows us to switch the various themes on and off to look at different types of record separately. The various themes are colour coded to make them easily identifiable and can be seen within the legend of each map.

## Historic Maps

We can supply copies of Landmark Digital mapping based on 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> and 4<sup>th</sup> Edition Ordnance Survey maps. These are drawn from several maps and are referred to as Epochs not Editions. It is important to note that Copyright restrictions mean that they must not be used in any report and are for research purposes only. If you have requested these they will be included below.

## GIS Shape Files

If you have access to a GIS system we can provide site location data as ESRI shapefiles for your own use as an alternative to the aforementioned mapping. This is the best way of sending and receiving complex spatial information. In built up areas where there are a large number of records, the data will be sent out in several files. We will provide site location data as individually themed shape files for each type of record.

## Maps included in this report are:

1. 1891 1st Edition Ordnance Survey, © Crown Copyright.
2. 1905 2nd Edition Ordnance Survey, © Crown Copyright.
3. 1938 4th Edition Ordnance Survey, © Crown Copyright.
4. 1954-1963 5th Edition Ordnance Survey, © Crown Copyright.
5. Modern Ordnance Survey map showing HER features: Monuments, © Crown Copyright.
6. Modern Ordnance Survey map showing HER features: Historic Buildings, © Crown Copyright.
7. Modern Ordnance Survey map showing HER features: Archaeological Events, © Crown Copyright.

## Guidelines for Access

The HER was set up as a planning tool 30 years ago and contained the minimum level of data. Since then the records have been added to and enhanced over the years as more information has come to light. The records, therefore, vary greatly in their detail and accuracy. We are constantly updating and improving these records, however, they are compiled from a range of sources of varying quality and the information they contain should not be seen as definitive. We cannot accept responsibility for the accuracy of any information supplied and the user must accept that information may be outdated or inaccurate. The HER search results will remain valid for 3 months only from the date of production, because the HER is constantly being updated as new sites of archaeological importance are identified.

We will provide details of Scheduled Ancient Monuments, along with maps showing their locations. The boundaries shown on our maps are intended to be a guide only and **the precise location of any SAM must be obtained from English Heritage.**

When information is provided in advance of metal detecting, the detectorist must agree to report detailed information for all finds, including an eight or ten figure grid reference, to the Portable Antiquities Scheme (via Angie Bolton, Finds Liaison Officer for Worcestershire and Warwickshire on 01905 721130 or [abolton@worcester.gov.uk](mailto:abolton@worcester.gov.uk))

The sources referenced in the reports should be consulted in order to fully understand the nature of the archaeology in your search area. While the majority of these reports can now be accessed online at [www.worcestershire.gov.uk/archaeology/library](http://www.worcestershire.gov.uk/archaeology/library), other sources may need to be consulted at the HER offices, and we recommend that you come visit the HER office once you have received your search results to consult all the sources mentioned along with other more general information that we hold.

The modern rural and urban environment is the product of millennia of change and development, producing dynamic landscapes of distinct historical character. **Historic Landscape Characterisation (HLC)** aims to holistically identify and map these character areas through examination of their current and preceding forms, facilitating a deeper understanding and appreciation of a landscape's evolution through time, and contextualising archaeological features within their contemporary landscape settings. Combining HLC and HER data can therefore provide a valuable tool for the research into many archaeological features and landscapes.

If your site is within, or close to, one of the 'Central Marches Historic Towns', you should consult the CMHTS report for that town. These can be found at [www.worcestershire.gov.uk/archaeology/library](http://www.worcestershire.gov.uk/archaeology/library) and relate to the following towns: Alvechurch, Bewdley & Wribbenhall, Broadway, Bromsgrove, Clifton-Upon-Teme, Droitwich, Evesham & Bengeworth, Kidderminster, Pershore, Redditch, Stourport-on-Severn, Tenbury Wells and Upton-Upon-Severn.

If your search area includes a Historic Farmstead or Outfarm, as identified by English Heritage's 'Historic Farmsteads Project', you should consult the current project publications, including the County summary, online at <http://www.english-heritage.org.uk/professional/research/landscapes-and-areas/characterisation/West-Midlands-Farmsteads-Landscapes-Project>.

### Diversity and Disability

Worcestershire County Council is committed to offering equal access to its services to all members of the community. We recognise that some of our customers will have particular communication needs, and we endeavor to provide services befitting to their individual requirements. This document can be made available in alternative formats (large print, audio tape, computer disk, and Braille) and in other languages (including British Sign Language) on request from the Corporate Equality and Diversity Team, County Hall, Spetchley Road, Worcester, WR5

2NP, telephone 01905 766 938, email [E&D@worcestershire.gov.uk](mailto:E&D@worcestershire.gov.uk). We also have staff trained in providing effective and appropriate face-to-face services to the deaf, deafblind, deafened, hard of hearing or speech-impaired customers; those with learning disabilities; and customers who need help communicating in English.

## Copyright

Sources referenced in the HER may require permission from the copyright holder for reproduction. This is often a third party. In these instances, the onus is on you to obtain permission for reproduction from the relevant person(s). The HER accepts no responsibility for any user making unauthorized copies of such documents. In some instances the HER has been granted permission by the copyright holder to give out a copy of a source for reference only. In these instances, you must not copy, pass on or publish that source without permission from the copyright holder. If Ordnance Survey maps are included in this report, then they are for reference only and require copyright permission from The Ordnance Survey for any reproduction.

Many of the sources used within the HER are 'grey literature' reports, produced through the modern planning and development process. Worcestershire HER holds its 'grey literature' library on the Online Archaeology Library (OAL). These sources can be downloaded directly from within the HER Search Report provided, however, before doing so please take note of the following copyright statement:

All reports that are produced via the development control process are considered to be within the public domain. However, copyright restrictions (particularly with regard to Ordnance Survey mapping) or the inclusion of confidential or commercially sensitive information means that not all reports can be made freely available over the internet. Other reports have been excluded by request of the copyright holder. The metadata for reports that cannot be accessed online has been included, but you must visit either our offices or Worcester City to view these reports.

The development of an online library can only be achieved if the organisations that supply data can be assured that their own rights are protected. Consequently, use of the library is covered by a variety of legal instruments to protect us, our users and those who supply data to us.

Online Archaeology Library Terms and Conditions:

<http://www.worcestershire.gov.uk/cms/pdf/copyright.pdf>

## Planning

National Planning Policy Framework (NPPF) was published in 2012 replacing Planning Policy Statement 5: Planning for the Historic Environment (PPS5). It sets out the Government's planning policies, including those on the conservation of the historic environment. If your search is in advance of a planning application, you may be required to describe the significance of any heritage assets affected, including the contribution made by their setting, in accordance Paragraph 128 of NPPF and the Local Authority's Local Plan. In order to do so you will be required to undertake a commercial search of the HER. Please contact us if you require this service or further advice in relation to planning policy and archaeology.

## Frequently Asked Questions

*Where is the HER located and when are you open?*

We can be found on floor 2 of The Hive, Sawmill Walk, The Butts, Worcester, WR1 3PB

We are available via phone or email Monday to Friday between 9am and 4pm. You can arrange to discuss your research with an archaeologist within our opening hours by appointment. These can be booked in half-hour slots, the first of which is free of charge but subsequent appointments will incur a nominal fee. The Hive is open from 8:30am to 10pm seven days a week with many of our resources accessible via self-service during these hours.

Monday	11:30 – 16:00	Thursday	11:30 – 16:00
Tuesday	11:30 – 16:00	Friday	11:30 – 16:00

Wednesday 9:30 – 21:00

Saturday 9:30 – 12:00 (2<sup>nd</sup> and 4<sup>th</sup> of the month)

*Can you provide a physical copy of this document and/or the sources mentioned within?*  
Yes, but only within The Hive and this will incur a small printing cost.

*Can you provide information for Worcester City?*

Archaeological records for the City of Worcester are held by the Worcester City Historic Environment Record. They are contactable on 01905 721 132 or by email at [archaeology@worcester.gov.uk](mailto:archaeology@worcester.gov.uk). In some instances we can answer simple queries on sites within the city, but if you wish for detailed information you will need to contact the city HER. We can book appointments for you with the City HER officer on Tuesdays in The Hive.

*What happens if my search area crosses county boundaries?*

While we occasionally hold records which cross county boundaries, you will need to contact the HER for the relevant county and request a separate search. The contact details for our surrounding counties are as follows:

Birmingham:	0121 464 7797	<a href="mailto:Mike.Hodder@birmingham.gov.uk">Mike.Hodder@birmingham.gov.uk</a>
Dudley:	01384 814 136	<a href="mailto:Pete.Boland@dudley.gov.uk">Pete.Boland@dudley.gov.uk</a>
Gloucestershire:	01452 425 705	<a href="mailto:archaeology.smr@gloucestershire.gov.uk">archaeology.smr@gloucestershire.gov.uk</a>
Herefordshire:	01432 260 130	<a href="mailto:smrenquiries@herefordshire.gov.uk">smrenquiries@herefordshire.gov.uk</a>
Shropshire:	01743 252 573	<a href="mailto:Historic.environment@shropshire.gov.uk">Historic.environment@shropshire.gov.uk</a>
Staffordshire:	01785 277 281	<a href="mailto:HER@staffordshire.gov.uk">HER@staffordshire.gov.uk</a>
Warwickshire:	01926 412 734	<a href="mailto:sitesandmonuments@warickshire.gov.uk">sitesandmonuments@warickshire.gov.uk</a>

# Archaeological Summary for Wickhamford Parish

An HER search was carried out on Wickhamford Parish on 15th January 2014. The parish contains 22 historic buildings, 8 of which are listed. They range in date from the 13th century to the 20th century and are dispersed throughout the parish. The majority of the listed buildings are situated in the conservation area which is to the north of the village itself.

Wickhamford is a landscape of medium sized regular fields characteristic of planned and parliamentary enclosure. Wickhamford was formerly a scattered settlement centred on the church and manor house to the north of the modern village, but 20th Century expansion has produced a linear settlement of development spread along the A44 interspersed with commercial orchards. An extensive linear settlement has been identified through surface remains and geophysical survey in the centre of the village on either side of Badsey Brook and it is here that the postulated Roman road from Hinton on the Green to Rycknild street crosses from east to west. Archaeological evaluation along the Honeybourne to Wormington pipeline identified Romano-British activity and evidence of medieval farming while cropmarks thought to represent Roman enclosures are recorded to the north of Broadway. Blocks of ridge and furrow are in evidence throughout the parish and can clearly be seen on the LiDAR coverage of the area.

HER Record	Number of Records*
Buildings	22
Findspots	x
Geology	x
Hedgerows	x
Landscape Components	x
Monuments	36
Parish Records	21
Parks and Gardens	x
Placenames	1
Archaeological Events	21
	[101]

\* Please note an absence of archaeological sites in a particular area should not necessarily be interpreted as an absence of archaeology. It may be that surviving archaeology has not been identified in the HER for a number of reasons. If it is thought likely that archaeology could exist in such an area, then the HER team will inform you of this.

# Statutory and other Designations

## Scheduled Ancient Monuments (SAM)

Scheduled monuments are those considered to be monuments of national importance. **There are no Scheduled areas within the search area.\***

## Listed Buildings

The Secretary of State for Culture, Media and Sport holds a List of Buildings of Special Architectural or Historic Interest, considered to be of national importance. Compiled under the Planning (Listed Buildings and Conservation Areas) Act 1990, the List includes structures from boundary walls and telephone boxes to cathedrals. **There are no Listed Buildings within the search area.\***

## Conservation Areas

A Conservation Area is an area considered worthy of preservation or enhancement because of its special architectural or historic interest, "the character or appearance of which it is desirable to preserve or enhance," as required by the Planning (Listed Buildings and Conservation Areas) Act 1990 (Section 69 and 70). **There are no Conservation Areas within the search area.\***

## Registered Parks and Gardens

English Heritage holds a Register of Historic Parks and Gardens of Special Historic Interest. These Registered landscapes are graded I, II\* or II, and include private gardens, public parks and other green spaces. They are valued for their design, diversity and historical importance. **There are no Registered Parks within the search area.\***

## Registered Battlefields

There are two Registered Battlefields in Worcestershire, The Battle of Evesham and The Battle of Worcester. Unlike Listed Buildings and the Register of Parks and Gardens, Registered Battlefields are not currently graded as a means of ascribing relative significance. **There are no Registered Battlefields within the search area.\***

## Locally Listed Historic Buildings

Worcester City, Redditch Borough and Wyre Forest District have a Schedule of Buildings of Local Interest in Worcestershire. These are buildings that are not of national importance, and therefore not Listed, but are considered to be of local or regional importance and make a significant contribution to the historic environment character of an area. **There are no locally listed buildings within the search area.**

\* Heritage Assets are designated by English Heritage. It is possible that the HER is out of date. NB. Other statutory designations may apply to your site which the HER does not record, such as Sites of Special Scientific Interest.

# Glossary of commonly used terms

**AS:** The unique number given to each aerial photograph referenced in the HER.

**Archaeological Event Record:** Records of archaeological work undertaken including when, where, how, by whom, and the resultant information regarding archaeological features, finds, archives and data.

**Cropmarks:** The visible effect of arable crops caused by the presence of below ground historic environment features.

**Geographic Information System (GIS):** a computer-based mapping system designed to allow users to collect, manage and analyse large volumes of spatially referenced data within a singular environment.

**HBSMR (Historic Buildings, Sites and Monuments Record):** The database, linked to our GIS systems, used to collate, manage and distribute archaeological records.

**Heritage Gateway:** An internet service managed by English Heritage allowing for cross-county searches of multiple historic environment datasets. Accessible at [www.heritagegateway.org.uk](http://www.heritagegateway.org.uk).

**Landscape Component:** An area of archaeological interest consisting of multiple component parts. For instance, a Second World War airfield with numerous structural and infrastructural elements.

**Monument:** an archaeological site either showing as visible remains on the ground or a below ground site revealed by, for example, aerial photography or geophysical survey.

**National Planning Policy Framework (NPPF):** Provides a full statement of Government policies for the identification and protection of historic buildings, conservation areas, archaeological remains and other elements of the historic environment.

**Palaeochannels:** ancient silted up river channels, or other watercourses that are often associated with well-preserved organic remains and historic environment features.

**Palaeo-environmental:** Organic remains associated with past landscapes. Such deposits can reveal information about climate, the types of fauna and flora in a landscape and past human activity.

**Ridge and furrow:** large-scale earthworks associated with former medieval and post-medieval open-field communal farming that appear as a distinctive corrugated surface.

**Sharepoint:** A web application allowing for the digitisation and distribution of documentation online at [www.worcestershire.gov.uk/archaeology/library](http://www.worcestershire.gov.uk/archaeology/library).

**SWR:** The unique source reference number given to each report, document or map etc.

**WCC:** Worcestershire County Council.

**WSM:** The unique number given to each monument, building and archaeological event recorded in the HER.

## General periods in the HER

The beginning and end of certain periods is a contentious issue. In the HER, the following dates are used. This is a standard convention across all HERs.

Palaeolithic	-500000BC to -10001BC
Mesolithic	-10000BC to -4001BC
Neolithic	-4000BC to -2351BC
Bronze Age	-2350BC to -801BC
Iron Age	-800BC to 42AD
Romano-British	43AD to 409AD
Post-roman (Early medieval)	410AD to 1065AD
Medieval	1066AD to 1539AD
Post- medieval	1540AD to 1900AD
Modern	1901AD to 2050AD

## Worcestershire HER News and Events

### **New Home – New Organisation**

The new Worcestershire Archive and Archaeology Service was born on the 1st January 2012 when Worcestershire Historic Environment and Archaeology Service and Worcestershire Record Office merged after many years of collaborative working. The Archive and Archaeology Service is based at The Hive providing both previously available and new, exciting opportunities to explore the past within facilities representing a vast improvement on those previously offered.

These include:

- All the records of the County's past (12 miles of archive) in one location for the first time;
- Access to the Historic Environment Record (with over 26,000 records) of the County and City and a place to talk to professional archaeologists about your interests;
- A search room for consulting original archives;
- A local studies and archaeology library;
- A conservation laboratory for the repair and preservation of documents;
- A programme of history and archaeology based events and activities for all ages and interests.

[www.thehiveworcester.org](http://www.thehiveworcester.org)

### **Walkpast 2012**

The Worcestershire Archive and Archaeology Service offers an annual series of guided archaeological and historical walks led by staff of the service. This year, five walks are scheduled on Sundays between June and October. For further information or to book your place contact Deborah Overton by telephone on 01905 765 905 or by email on [doverton@worcestershire.gov.uk](mailto:doverton@worcestershire.gov.uk).

### **Coming soon: Picture Cabinet**

The Archive and Archaeology Service, along with Worcester City Art Gallery and Museum and Libraries and Learning, has signed up to Picture Cabinet, an online service that allows the general public to buy prints of images. The prints will have an archaeological or historical theme and will be available at various sizes. The service is currently in development and will be available online soon. Picture Cabinet is funded by the Libraries and Learning Service.

# Worcestershire Archive and Archaeology Service

## Monument List Report

Report prepared by Worcestershire HER, tel: 01905 765560 or email [archaeology@worcestershire.gov.uk](mailto:archaeology@worcestershire.gov.uk). Information is valid for three months from date of production.

### Description

On the site of a medieval grange of Evesham Abbey. Basically late 16th century ensemble, partly stone, partly narrow studding. Much is early 20th century, possibly by G.C. Lees-Milne including the front of the north wing. Extensive north and west additions incorporating one of three timber-framed or stone barns. [1]

16th century: no features appear to be older than the 16th century. Although parts of wall may be earlier. Parts are new and restored. Timber frame east front. East facing gables at either end. Walls partly rubble. Wooden casement windows, leading lights, some oriel windows. [2]

House. Probably 16th century with early 20th century alterations and extensions. Timber-framing and limestone rubble with tile roofs. Irregular plan. Two storeys. East front has two projecting gabled cross-wings and a recessed centre. The windows are timber casements with leaded glazing. The left-hand wing is of one bay and is close-studded with middle rails to each floor. The gable is similarly studded and has a tie-beam and collar. The recessed centre is close-studded and has a wide window on both floors. To each side on the first floor are small windows. At the right is a doorway. The right-hand cross-wing is of stone except for the front of the upper storey, where close-studded framing is exposed. The gable has a king-strut and fish-bone bracing. At the right is a gabled 20th century extension. Chimneys to left and right and at rear. Interior: not accessible at time of survey. A room on the south side of the house is said to contain a wide fireplace with flat four-centred stone fireplace and a 17th century panelled wood chimneypiece with inlaid patterns in the panels. The house was the boyhood home of James Lees-Milne and is mentioned in his autobiography. [3]

Abbot Randulf built a new grange at Wickhamford in the early 13th century. Later Roger Yatton carried out major improvements to the property, first by building a new tithe-barn next to the fishpond and rebuilding the large grange. The barn is now destroyed but irregularities in the lawn between the present manor-house and fishpond and also some earthworks on the far side of the Badsey Brook, but whether these can be identified with any of the grange buildings is an open question. [4]

In the late 16th century it was recorded that there is a tithe barn in the farmer's court standing directly over against the dwelling house of the farmer containing eight bays. This seems to support the identification of the barn with the irregularities of the lawn rather than the site across the Badsey Brook. [5]

Site of National Significance. [6]

Image showing part of east and south elevations taken in 2001. [7]

The manor was requisitioned in 1942 and used by the Home Guard as their local HQ. Information from WO166/6786 at Public Record Office and 238-02 at County Record Office. [8]

### Description

At the northern end of village behind the manor house. Ashlar west tower and nave, plain south porch dated 1730. 13th century chancel of coursed lias. Nave remodelled about 1640. West tower completed in 1686. Blomfield's restoration of 1890 was either exceptionally low-key or it was 'undone' by G.C.Lee-Milne in 1949. [1]

See also Victoria County History. [2]

14th century, re-faced in 17th century, with 13th century chancel and 17th century tower. Restored 1949. Squared limestone, with chancel walls of rubble. Stone slate roof. Comprises a west tower, nave, south porch and lower chancel. The tower is of three stages with diagonal buttresses to the lower stage and has an embattled parapet with corner pinnacles. On the south side is an illegible inscription with oval surround. The bell openings are of two chamfered pointed lights under a pierced pointed head. The middle stage has chamfered louvred openings with round heads. The west window is of three cusped lights under a flat head with hood and lozenge stops. To the west of the porch on the south side of the nave is a 18th century window formerly lighting a gallery. It is rebated and chamfered and has a keyed round head. To the right (east) of the porch are two windows of two cusped lights under flat heads with hoods and lozenge stops. The gabled porch has a doorway with plain reveals and timber lintel. At the apex is inscribed "1730", possibly altered from "1723".

The inner doorway has a canted head. The south wall of the chancel has a chamfered lancet window and a priest's door with flat head. To its right is a restored window of two cusped ogee lights under a depressed pointed head. The north wall of the nave has a window of two trefoiled lights with a quatrefoil in the head. To the east there is a window of two lights under a flat head. In the north wall of the chancel are two blocked lancets. The east window is of two cusped ogee lights under a pointed head, also restored. Interior: the tower arch is chamfered and has moulded imposts. It is partly covered by a restored west gallery carried on two timber posts. The three nave roof trusses have tie-beams, vertical struts, upper collars, and interrupted lower collars. At the eastern end is a ribbed boarded ceiling. The chancel arch is pointed and chamfered in two orders which die into the responds. Above are the painted arms of Charles II, dated 1661. On the south side of the nave are box pews which retain some 17th and 18th century woodwork and include carved panels of various dates, of continental origin. On the north side is a three-decker pulpit which incorporates some similar material. The chancel is ceiled at collar level and has tie-beam trusses with vertical struts. On the south side is a pointed piscina. On the east wall is a defaced medieval wall-painting on a red ground. The turned communion rails are 18th century. On the north side of the chancel are the Sandys monuments. Two panelled alabaster chest tombs share a single tester carried on four round arches which spring from black marble columns with Corinthian capitals. On the tombs lie the effigies of Sir Samuel Sandys (died 1626) and his wife Mercy, and of Sir Edwin Sandys (died 1626) and his wife Penelope. Above the tester are shields of arms, obelisks and carved figures. The chest are carved with kneeling children. [3] [5]

Newspaper article 19/06/1993 Memorial tablet to Penelope Washington, daughter of Colonel Henry Washington, Royalist Governor of Worcester during the Civil War siege of 1646. His father was grandfather of George Washington, first President of the United States. [4]

Also mentioned in source [6].

West tower: 17th century originally unbuttressed. Nave: Decorated window in North wall Chancel arch: decorated beam above with Perpendicular Chancel: 13th century never received stalls East window: Decorated Late 13th century wall painting. Many 17th century features {1}

### Monument Types and Dates

DOVECOTE (13TH CENTURY AD to 21ST CENTURY AD - 1250 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	STONE

### Description

Dovecote. Probably 17th century. Limestone rubble with stone slate roof. Circular plan, with conical roof and timber Glover. String course below eaves. On the north and south sides are louvred openings with plain reveals. On the south side is a low doorway with quoined reveals. [1]

13th century dovecote of stone and slaters. [2]

Erected about 1220 by Abbot Randolph who is said to have built a grange at Wickhamford. Walls of stone and roof of stone slates. [3]

The fifth of Abbot Randolph's dovecotes. Stands in the Manor House garden adjacent to the fishpond. It is almost certainly medieval in origin though whether it can be dated as early as the first half of the 13th century is open to question. Suffers from subsidence and there is evidence of more than one rebuild. Contains elevations and plans. [4]

Photographed on 20/1/2001 showing South East elevation. [5]

Evidence STRUCTURE

HOUSE (18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Evidence EXTANT BUILDING

### Description

House and water-powered corn mill. 18th century with late 19th century house. Mill of limestone rubble; house of brick. Tiled roof. On the East side the mill has a window with segmental head. To its left is a doorway with plain reveals and external stone steps. To the right at a lower level is a doorway above the brick culvert of the tailrace. The upper part of the wall is rebuilt in brick and has a window with segmental head and a brick chimney. One gabled dormer. The house, at the right, is of brick on a stone plinth and is gabled. It has three casement windows with segmental heads, including one lighting a stair. Within the stone plinth is a window with glazing bars and plain reveals. Interior: not accessible at time of survey (January 1987). When previously listed in 1973 the machinery was largely intact and included a cast iron wheel with elm buckets, and timber and cast iron cogs and wheels. [1][3]

A mill worth 40d is mentioned in the Domesday book under Wickhamford and Bretforton. In the Taxatio of Pope Nicholas dated 1291 a mill at Wickhamford is noted as worth 6s 8d. [2]

TIMBER FRAMED HOUSE (17TH CENTURY AD to 21ST CENTURY AD - 1601 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	RUBBLE
Main building material	TIMBER

### Description

House. Circa 1600 or earlier. Timber-framing and painted rubble. Exposed framing in square panels. H-plan. Cross-wings each of one bay, with painted rubble on ground floor. Left-hand (North) wing has gable truss with two collars and vertical struts. Right-hand cross-wing similar, but with V-struts above the upper collar. The centre is rendered and of one storey with attic. On the ground floor is a casement window with segmental head. Above is a dormer. Door to left of centre within gabled porch. Chimneys on outer walls of cross wings and on ridge to right of door. Some of the exposed framing has been repaired with applied timbers. Interior: not accessible at time of survey (January 1987). The age of the building is not clear from the outside; the low eaves height of the centre of the building makes an open hall possible. [1]

About 1600 or earlier, H Plan. [2]

### Description

Finds of flint leaf shaped arrowhead, William III half penny 1700; Charles I Rose Farthing 1635 - 1644; Tewkesbury, Gloucester, token of Samuel Jeenes. [1]

Unlocated find submitted by Four Parishes Archaeology group. Small limestone cube thought to have been found in vegetable garden at Hazloe Lane, Evesham. Probably a medieval chess piece (bishop or pawn). Usually wood or bone, a stone counter is unusual. [2]

Group of Roman pottery recovered from excavation of a "reservoir site" in Evesham. Located as part of an on-going WHEAS project P2898. [3]

Hand collected assemblage by P.H.Roe. All 14 sherds were Roman with little abrasion, some being Samian ware. There were 6 sherds of Fabric 12, 2 sherds of Fabric 14, 1 sherd of Fabric 22, and 5 sherds of Fabric 43. [4]

Romano-British pottery - possibly from an Iron-Age site found said to have been found near Knowle Hill. Record card contains pencil written note but no other information. Entry has been made but source of, and nature of, material not known. [5]

A find of a heavily clipped siliqua (rather than a half siliqua) of an emperor of the later 4th century. Reverse: Roma seated left holding Victory on globe and reversed spear. Some of the various mints are shown with a relatively small head. Fine but for clipping. Found at Greenhill, Evesham. [6]

Gold Dobunnic coin of Bodvoc. Location given as SP0343. Found before 1960. Two silver Dobunnic coins. Location given as SP0343. Found in 1938. Silver Dobunnic coin. Location given as SP0343. Found in 1898. [7]

**Monument Types and Dates**

ROAD (ROMAN - 43 AD to 410 AD)
Evidence CONJECTURAL EVIDENCE

**Description**

This is the Parent Record for the Roman road between Hinton on the Green and Honeybourne which has been divided into four stretches.[1]

Cox notes that the line of this suspected Roman road starts with what he calls the Warwickshire to Worcestershire ridgeway and for the first 100 metres forms the boundary between Hampton and Wickhamford. It later passes the Romano-British farm site but misses altogether the medieval village of Wickhamford. He suggests that it entered Badsey through SP 072418 and Bretforton through SP 088423. At SP 097425 it crosses a stream at Stoneford and misses the medieval village of Bretforton Upper End. Cox then goes on to note that its subsequent course is unclear but probably joined Ryknild Street at Honeybourne. His conjectures that the road's straight course, its use of parish boundaries, its distance from medieval settlements and the name Stoneford on its route all suggest a Roman origin [2]

The plotted alignment should be regarded as conjectural.[3]

Course of road visible on LiDAR coverage. Road also shown on 1811 Ordnance Surveyors' Drawing (2" to the mile).[4][5]

Shown on Hinton on the Green tithe map (1841) and in to Wickhamford tithe map (1842) where the northern section is mainly a long wide parcel, called Broad Lane and to the north Green Street (parcels 24 and 16 respectively).[6]

BATTLE HEADQUARTERS (World War Two - 1939 AD to 1945 AD)

Evidence DOCUMENTARY EVIDENCE

### Description

The Sandy's Arms was the location of the Platoon Commander's position, riflement and platoon reserve. As such it was the centre of control for any actions around the road blocks in the vicinity. This would normally be called a Battle Head Quarters. Post may have been sandbagged for additional strength.[1][2]

Wickhamford Tithe map (1842) shows this building. It is described as a 'Public House and Blacksmith's Shop', it was owned by Lord Sandys and occupied by John Pethard. Ordnance Survey 1st Edition map shows it a Sandys Arms. Building visible on Google Streetview (image date 2009) still called Sandys Arms. It is a two storey building with a tile gable roof with dentillated eaves. It has been completely rendered and painted. Square headed window openings with replacement windows. Tiled gable porch over the front door. Chimney stack projecting through the roof in the front wall of the building. Projecting wings to the rear. Originally stood on main road but course has been straightened. Dates are conjectural.[3][4][5][6]

### Monument Types and Dates

ROAD BLOCK (World War Two - 1939 AD to 1945 AD)

Evidence DOCUMENTARY EVIDENCE

### Description

Approximately 200 yards south of the Sandy's Arms. Wickhamford. The Home Guard established a traffic control point here. This would not be a full road-block but would be a barrier sufficient to bring traffic to a halt. Commonly this would be a knife-rest.[1][2]

### Description

Field Farmhouse was to be used as a rifle position covering a traffic control post on the road bridge carrying Broadway Road over Badsey Brook. It was probably intended to sandbag an upstairs window to provide some protection for the riflemen.[1][2]

Identifiable on the 1st Edition OS map. [3]

Field Farm/Orchard Court (Field Farm), Wickhamford. Partially extant 19th century (?) unlisted farmstead with converted buildings. Regular courtyard with multiple yards. Prominent L-plan regular courtyard in association. The farmhouse is detached with side on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Isolated location. Large modern sheds are located on the site. [4][5]

West Midlands Farmsteads and Landscapes Project Regional Statement [6]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [7][8]

Farmhouse: 19th century (?) Working building(s): 19th century (?). Brick. Planning application submitted in 2005. Appears partially converted on Google Earth [9]

### Monument Types and Dates

PILLBOX (World War Two - 1939 AD to 1945 AD)

Evidence	CONJECTURAL EVIDENCE
Evidence	DOCUMENTARY EVIDENCE

### Description

About 100 yards to the west of the Sandy's Arms and on the north side of the Broadway Road. No details are available for this defence post which may be a contemporary term for a pillbox. At the very least the defence post would have been a sandbagged weapons position. In addition to being a rifleman's post, this would also be used as a bombing post (grenades) for the nearby road block.[1][2]

EVENT (ROMAN 1ST CENTURY AD to PRE CONQUEST - 43 AD to 999 AD)	
Evidence	UNSTRATIFIED FIND

**Description**

Finds by a metal detectorist include a copper Dolphin brooch originally silvered dating to the 1st century, two silver Roman coins and a decorated diamond shaped copper alloy object with a form of attachment on one side. [1]

A small assemblage of late Iron Age to Roman finds including coins and flue tiles reported as coming from Badsey Fields was located as part of an ongoing WHEAS project P2898. [2]

### Monument Types and Dates

Guard Post (World War Two - 1939 AD to 1945 AD)

Evidence DOCUMENTARY EVIDENCE

### Description

Probably a sandbagged upstairs window but no details are available.[1][2]

Mid to late 19th century house, polychromatic brickwork and roof tiles. Pair of semi-detached houses, both L shaped (mirrores with half hipped wing towards the road. Central Chimney stacks projecting through the roof. Not on Wickhamford Tithe map but shown on Ordnance Survey 1st Edition map. Visible on Google Streetview (image date 2009).[3][4][5][6]

ROAD BLOCK (World War Two - 1939 AD to 1945 AD)

Evidence DOCUMENTARY EVIDENCE

### Description

To the east of the road bridge over Broadway brook. The Home Guard established a traffic control point here. This would not be a full road block but would be a barrier to bring traffic to a halt. Commonly this would be a knife rest.[1][2]

PILLBOX (World War Two - 1939 AD to 1945 AD)
Evidence DOCUMENTARY EVIDENCE

**Description**

On side of road opposite Sandy's Arms, Wickhamford. No details are given for this defence post which may be a contemporary term for a pillbox. At the very least the defence post would have been a sandbagged weapons position. In addition to being a rifleman's post this would also be used as a bombing post (grenades) for the nearby road block.[1][2]

### Description

An extensive series of brick farm buildings arranged in courtyard fashion. Mapped record relates to those buildings also present on 1st edition Ordnance Survey map. Partly proposed for conversion.[1]

Field Farm/Orchard Court (Field Farm), Wickhamford. Partially extant 19th century (?) unlisted farmstead with converted buildings. Regular courtyard with multiple yards. Prominent L-plan regular courtyard in association. The farmhouse is detached with side on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Isolated location. Large modern sheds are located on the site. [2][3]

West Midlands Farmsteads and Landscapes Project Regional Statement [4]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [5][6]

Farmhouse: 19th century (?) Working building(s): 19th century (?). Brick. Planning application submitted in 2005. Appears partially converted on Google Earth [7]

BARN (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

Evidence	EXTANT BUILDING
Main building material	BRICK
Main building material	LIMESTONE
Main building material	TILE

### Description

Barn. 19th century with alterations of about 1900. Limestone rubble and brick with tile roof. South wall has two wide doorways, the left-hand one with plain rubble reveals and the right-hand one with brick reveals. Between them is a blocked doorway with brick surround. To its right is a window with plain reveals. At the right of the wall is a similar window. Above the right-hand doorway is a brick gable with loading door and sack hoist. Included for group value. [1]

Evidence UNSTRATIFIED FIND

### Description

WAW-AA3BB8. Base Silver coin. Recorded during Hidden Treasures Roadshow [1].

WAW-AA9AD5. An incomplete copper alloy Roman chatelaine plate brooch. The body of the brooch is a rectangular shape with a pointed upper edge. In the centre of the body there is a high-relief slightly hollow conical. Protruding from the upper three corners are integral decorative lugs, and from the lower two corners of the brooch there is a hinge. The central conical is decorated with low relief inverted triangular cells, 6 in total, one has traces of red enamel which is now a light green colour. On the body of the brooch, around the central conical there are more triangular cells, which some may have traces of yellow enamel within. The upper central lug is almost circular in plan and has a four petalled flower as decoration. Three of the fields around the flower are filled with yellow enamel, the fourth has blue enamel. The lugs on the upper side corners of the brooch are also circular with a central circular cell. There is possibly enamel within the field around this cell, but it is unclear whether there is any enamel in the central cell of the lug. The hinges on the lower corner are formed by integral lug with holes running through, there are traces copper alloy wire within the hinges. Johns illustrates a similar complete example (Figure 7.22) and discusses that these brooches are not often common Romano-British finds. The reverse of the brooch is undecorated. Along the lower edge of the brooch there are two vertical lugs which provide the hinge mechanism for the pin. The pin is made from cast copper alloy and is hinged to the lugs with a fragment of copper alloy wire. The catch plate is at the upper most central corner/lug, and is complete. The surface of the bracelet has a well developed mid green patina. All the toiletry set is missing. It measures 40.6mm long and, 40.3mm wide. It weighs 12.79g [2].

WMID664. Brooch. Wings are incomplete, one wing is missing. The remaining wing is slightly concave, but not enough to contain a spring. No decoration is obvious on the bow. The catchplate is incomplete [3].

EVENT (MEDIEVAL - 1066 AD to 1539 AD)

Evidence UNSTRATIFIED FIND

### Description

WMID4406. Purse. The handle is a drop-shape in plan which terminates at the bottom with a trapezoidal block with horizontal grooves. Below this block the circular cross sectioned shank protrudes, which terminates with a bulbous rove. The central block, which is sub-rectangular with rounded corners in plan. Protruding from the sides of the central block is a circular cross-sectioned bar, which has vertical grooved moulding, with a narrowed circular section which then terminates with a bulbous terminal. This terminal appears to have a hole through the centre through which the bar enters. The terminal of the bar has been flattened so that it is flush with the terminal. Only one bulbous terminal remains, the other bar is incomplete. The complete bar has an attachment where the bar fits through a circular hole on a sub-rectangular plate. On the loop and central block there are traces of tinning/silvering. Otherwise the patina is fragmentary and is a dark green colour [1].

### Description

WAW-739F07. Roman Coin: it is either an as or a dupondius. Both of these dominations were in use from 23 BC to 260 AD. The style of the bust may suggest a 1st century date for this coin. It is very worn, therefore the legends are not visible [1].

WAW-89BDE3. A cast lead or lead alloy button. The button head is sub-circular in plan, the front is domed and the back flat. The back has a central integral loop, which is not sited on a stem terminal. The front of the head is decorated with a high-relief cross pattee with a central pellet, and the arms of the cross having transverse ridges. The surface has a matt beige coloured patina. The diameter of the head is 11.55mm diameter and 15.68mm long from the apex of the loop to the furthest edge of the head. It weighs 3.3g. Egan and Pritchard (Egan and Pritchard 2002 Dress Accessories Boydell Press) illustrate similar buttons, particularly, No. 1381 which is decorated and described as cast from a three-part mould. These buttons date to early 13th to 14th century [2].

WAW-969902. A Post Medieval cast lead or lead alloy cloth seal. It is composed of two sub-circular discs linked with an integral ribbon. The ribbon is folded in half, thereby the two discs lay over each other with the stud passing through the perforation in the second disc. Both discs have then been flattened and stamped with '?f // W' on one face and 'L 8' on the other. The 'f' shaped figure may be a privy mark which identifies an artisan dyer (Egan G. 1992 Leaden cloth Seals Datasheet 3 Finds Research Group 700-1700 p. 4). The surface of the seal has oxidised forming a mottled cream/grey colour. It measures 24.79mm long, 18.11mm wide and 4.15mm thick. It weighs 7.7g. Cloth seals were in use between the 14th and 18th centuries (Egan, G. 1989 'Leaden Seals for Textiles – Some Archaeological Evidence Relating to Fabric and Trade' Costume No. 23) as a form of quality control. The seal probably dates to the 16th to 17th centuries [3].

WAW-A9F8D5. Medieval Coin: halfpenny of Edward I, II or III [4].

WAW-AE3AA5. A Post Medieval cast lead or lead alloy cloth seal. It is composed of a large sub-circular discs with a possible smaller second disc on the reverse. It is unclear how they are connected as there is no integral ribbon. The face of the large disc has a central ornate shield with a '+' at the apex and an unclear design below. Around the edge there is a legend starting with a crescent and then possibly reading 'RAE[ ]S[ ]'. The smaller disc on the reverse has '20' slightly off the flan. The field around the smaller disc, on the reverse of the larger disc has a coating of faint pellets. The surface of the seal has oxidised forming a cream colour. It measures 27.82mm long, 26.72mm wide and 4.18mm thick. It weighs 8.9g. Cloth seals were in use between the 14th and 18th centuries (Egan, G. 1989 'Leaden Seals for Textiles – Some Archaeological Evidence Relating to Fabric and Trade' Costume No. 23) as a form of quality control. Larger seals were used in the 17th to 18th century, for example from Colchester (Egan G. 1992 Leaden cloth Seals Datasheet 3 Finds Research Group 700-1700, Figure 11a-c) [5].

WAW-AED541. The portion of the buckle which remains is the apex of the loop and some of the sides. Egan and Pritchard illustrates similar frame (No. 421), but this is not decorated with a face. The face is possibly that of a man with a beard, but otherwise there is no headwear or clothing visible. The London example is dated to the 14th century. It is made from cast copper alloy. The loop which protrudes from either side of the neck is triangular in section. Each terminal of the loop is broken, but not recently. The reverse of the frame is flat and flush with the protruding head. The object has a dark green shiny patina. It measures 21.6mm long, 19mm wide and weighs 1.88g [6].

WAW-AFDF12. A sub-circular cast copper alloy ring or loop, with a slender sub-pointed oval section. In profile the loop is slightly twisted. The loop has an abraded surface with traces of a mid green patina. It measures 26.13mm long, 24.24mm wide and 1.6mm thick. It weighs 1.5g. Similar rings are illustrated in Margeson's, (1993) Norwich Households; Medieval

and Post Medieval Finds from Norwich Survey Excavations 1971-78. East Anglian Archaeology Report No. 58. Margeson describes them as being suspension rings which were probably multi-functional, including curtain rings. The three excavated from Norwich (No. 522-524) date from the mid 15th to mid 17th century. However the recorded example is possibly not as robust as these, and another function is likely [7].

WAW-C6DA15. Strap Fitting. The object is probably a type of strap guide. It has three integral components, an upper small loop, a connecting block and a lower large loop. The upper small loop is rectangular in plan, with the two upper corners being rounded. The hole in the centre is circular and is 3.93mm wide. The edge of this hole has a small casting sprue, which may suggest the object has not been used particularly often. Below the hole, on the outer and side faces there is a horizontal ridge. The second component, the integral connecting block has moulded decoration. Firstly a narrowed rectangular sectioned block which is seated above a sub-square shaped block which has concave outer and side faces. This portion is seated above the third component of the object, the large loop. The loop is perpendicular to the small upper loop. In profile the loop is an elongated drop shape with a horizontal tip. The outer face of the loop, along the edges, has three scallops on either side as decoration, forming three joined sub-oval shapes. Each oval is decorated with incised decoration consisting of a 'X' within a border which matches the shape of the oval. The reverse face of the loop, connecting block and small upper loop are flat, undecorated and flush with each other. There are obliquely angled file marks on the reverse. The surface of the object has a well developed mid grey patina. It measures 45.37mm long, 7.27mm wide and 9.21mm thick. The object weighs 6.81g. The object is likely to be a type of strap guide, either from a harness or a dress fitting. The date is more uncertain, but may be Medieval rather than Roman. This is suggested by the style of the incised decoration, the scalloped edges and the loop. However, Roman implements, such as toilet instruments have similar small upper loops and connecting integral blocks [8].

WAW-C6EE11. Post Medieval coin: an Irish farthing of Charles II, issued by Armstrong between 1660 and 1661 [9].

WAW-F76B32. A possible fragment a pro forma cast lead cloth seal. The seal is a sub-rectangle in plan with one terminal being abraded and therefore incomplete. In profile the pro forma is tubular and has then been flattened, which is probably intentional. The reverse plate is more incomplete than the upper plate. The upper plate has lettering in high-relief reading 'XXXIII' within a rectangular beaded border. The reverse is has a possible high-relief design which is very faint and may include a 'J'. The surface of the pro forma has a matte off-white coloured patina. It measures 26.39mm long, 17.69mm wide and 2.13mm thick, weighing 4.7g. Dr. Geoff Egan (Portable Antiquities Scheme Finds Advisor) comments on a previous pro forma (WAW-79D3C6) found in Worcestershire that pro formas were cast with the dimensions, as required by law, of a particular variety of cloth. 34 is may be the length in yards of the fabric or its weight. When examining the cloth government officials measured and weighed the cloth and checked it conformed to specifications. 'Searched' was stamped in the blank area below the figures, and then the seal was closed and fixed to the textile so it could be seen on the market stall. Egan goes on to comment that the seal dates from the transitional Medieval to Post Medieval period of the late 16th century to c1620, and this is probably the second to be discovered in Worcestershire. Other examples are illustrated in Egan, G. 1995 Lead Cloth Seals and Related Items in the British Museum Occasional Paper 93, Nos. 117 to 119 [10].

WAW-F794D6. A cast copper alloy pendant or mount which is possibly Early Medieval. The pendant or mount is an inverted sub-drop shape in the shape of a human face. From the back of the upper edge is there is an integral lug with a circular perforation at the apex of the loop. The perforation is slightly sub-circular, possibly due to wear along the upper edge, therefore suggesting it is a pendant rather than a mount. The pendant is domed in profile with a slightly hollow reverse. The head has straight hair depicted by slightly oblique linear grooves. The eyes have a central pellet within a oval frame. The nose is a high-relief sub-rectangle with slightly concave sides and rounded edges. Either the mouth or the moustache is depicted as a transverse ridge. The lower edge of the pendant becomes narrow in profile until it is broken. This break is not too recent. The surface of the mount has a mottled green/brown patina which is slightly abraded. It measures 30.89mm long, 13.81mm wide and 6.99mm thick. It weighs 7.4g. The face is similar in style to that found on other Early Medieval objects, such as a similar object recorded from Surry (SUR-350D51), or the 9th century lead vat recorded from Northamptonshire (WAW-A4D8D4). The function of the object is not certain [11].

WMID1159. An iron nail-like object. The head is sub-circular and slightly domed. The head has been slightly damaged and an edge has become straight. On the reverse there is a single stud in the centre which has a rectangular section and tapers to a point [12].

WMID1160. Fragment of a stoneware which has a salt-glaze. There is a high relief female bust within a circular border. The bust is wearing a cloth hat. The dress which is visible has a high lace neck, and a square collar. The fragment is slightly concave [13].

WMID1333. The arrowhead appears to be incomplete. There has been damage to one edge and the tip of the arrowhead, therefore the arrowhead would have been originally longer and triangular in shape [14].

WMID1832. The tile is slightly curved in profile. The item is only a fragment therefore the complete profile is not visible. At the apex of the curve there is a finial which is a leaning conical. There are traces of glaze on the upper surface of the tile. The fabric is a light orange/brown colour with sandy inclusions [15].

WMID1837. Single loop trapezoidal shaped buckle. The notched edge of the loop is expanded. The three other edges are the same widths and depth. Decoration consists of oblique notches on the edges of the buckle, with the expanded loop have two incised parallel lines forming an internal border. The reverse has four oblique notches on the expanded loop and traces of tinning. On the strap bar there is a trace of iron corrosion suggesting there was an iron pin [16].

WMID2263. Harness Pendant. The body of the pendant is a small quatrefoil which has a high relief square shape in the centre. Protruding from the upper petal is a lug perpendicular to the pendant. This lug has a small hole within which there are traces of iron. The lug is bent forwards slightly. The reverse is plain [17].

WMID4636. Dress Hook. The body of the dress hook is sub-circular with a rectangular loop protruding from the upper edge. Decoration of the body of the object consists of a border of annulets around a central larger annulet. Protruding from the lower edge is a hook which is semi-circular in cross-section and 'U' shaped in profile. The reverse is undecorated [18].

WMID5223. The fabric of the sherd which remains is a grey colour with an ornage exterior surface. The exterior surface is covered with a mid green coloured glaze. The vessel had been mended by lead. There appears to have been two holes in the vessel thereby the lead forms a loop around the sherd. The exterior surface of the lead is an irregular shape and appears to have been shaped by a two fingers because fingerprints are visible. On the interior of the vessel the lead is a relatively narrow band [19].

WMID588. Dress Hook. Triangular shape with a rivet hole in each top corner. The lower third corner has a possible worn zoomorphic head that leads to a hook. The border of the tag has an incised border groove which has perpendicular lines from the incised line to the edge [20].

WMID607. Circular cloth seal. Obverse has [ ] LEMS GO [ ] around the edge with a sword in the centre. The reverse has stars and lozenges around the edge and 2[ ] in the centre. The seal is two circular discs joined by a narrow band. The centre of the reverse appears to have been cut into a separate circular disc. Could this have been caused by the die? [21].

WMID6091. Medieval Silver Coin [22].

WMID628. Brooch. Only the upper plate remains. The plate is sub-trapezoidal in shape, with a knop on three sides of the plate. There is an elongated trapezoidal platform in the centre of the plate. From this platform an arched strip of copper alloy forms which has a broken edge, but which would have formed the upright of the brooch. On the reverse is a vertical protruding plate which is incomplete [23].

WMID660. Buckle. Narrowed and offset strap bar. Diagonal lines on the upper face as decoration. Part of the pin remains curled around the strap bar [24].

WMID661. Appears to be a rams head and neck. Ornate style. The reverse is straight and a flange it 90° runs across the upper edge. Something has broken off the base of the item. Possibly a mount? [25].

WMID674. Strap Fitting. The lower plate is sub-circular with four rivets in each corner. The upper plate is also sub-circular, however there is an oval shaped openwork at one end, leaving a small gap on the edge. On the upper plate there is incised decoration which appears to be two leaves creating a 'V' with a fleur-de-lis at the centre base. At this base there is a further rectangular shape which the lower plate lacks. This rectangular shape is moulded with two rows of four circular indentations. Two outer indentations are openwork, but maybe too small for rivets. Between the lower and upper plate there are traces of leather [26].

WMID675. Seal Matrix. Oval base. Hexagonal stem terminating in a trefoil loop. The device is a bird, like an heraldic eagle [27].

WMID676. Two long-cross hammered coins, both folded in half and interlocked with each other, forming a flat conical shape. One is a York penny, the other a Durham mint. Both Edward I [28].

### Description

WAW-013810 - The object is a Post Medieval button, dating to the 17th century. Read, B (Metal Buttons 2005) illustrates similar buttons, Nos. 152 etc. which have similar dating. The button is made of cast copper alloy. In plan it is circular and the head is 5.12mm thick with rounded edges. The upper surface is decorated with a double-stranded cross design, each strand terminating with a scroll. The centre of the cross has an ornate four-petalled flower. Between each strand is a column of small annulets, terminating with two crescents facing each other. In the field of the cross are also annulets. All the annulets appear to have been stamped/punched. The edge of the button is bordered with a ring of crescents. The reverse is flat with a central integral loop. The loop is more of a lug, it is semi-circular in plan with a sub-circular hole towards the base of the lug. The surface of the button has an incomplete dark green/grey patina however there are also areas of red copper corrosion. The button measures 28.8mm diameter and 10.88mm thick. It weighs 17.8g.[1]

WAW-019CB1 - The sherd is a portion of a rim, possibly from a cooking pot. The rim, in profile is angular, forming an inverted 'L' shape. The sherd probably dates to the Medieval period. The fabric is hard, and the surface is a dark grey/black colour. This maybe due to smoke, rather than the colour of the fabric. There are frequent white flecked inclusions which may be shell, there are also occasional large dark grey/black inclusions. The core is a dark grey, with mid grey margins and red surfaces beneath the probable smoke discolouration. The sherd weighs 28.9g and is slightly abraded.[2]

WAW-01C011 - The sherd is a portion of a rim, of an unknown type of vessel. The vessel is a utilitarian type of vessel rather than table ware. The rim, in profile is curvaceous, and is similar shape to a mushroom. It has a bulbous 'head' in profile with a narrowed body beneath. The sherd is either Roman or Medieval. The fabric is a reduced ware. hard, and the surface has a mottled grey/black colour. This maybe due to smoke, rather than the colour of the fabric. There are no obvious inclusions. The fabric is otherwise a mid grey colour. The sherd weighs 22.2g and is slightly abraded.[3]

WAW-01D631 - The sherd is a portion of a rim, of an unknown type of vessel. The sherd is Roman, it is a Black Burnished Ware. This dates to the c. 120 - c. 350. The fabric is a dark grey colour throughout with small quartz inclusions. It is quite soft. The sherd weighs 6.8g and is slightly abraded.[4]

WAW-022646 - The sherd is a portion of a rim, possibly from a cooking pot. The rim, in profile is angular, forming a sub inverted 'L' shape. The sherd probably dates to the Medieval period. The fabric is hard, and the exterior surface is a mottled orange/beige colour while the interior is a mid brown/grey colour. The core is a mid grey colour. The fabric has frequent cream/white coloured inclusions, which don't appear to be shell, perhaps limestone. The sherd weighs 17.6g and is slightly abraded.[5]

WAW-04F7C2 - The sherd is a fragment of the base and body of a vessel, possibly a jug. The exterior surface of the body, at the base is undulating, with a pinch mark. There is also a trace of a brown/green glaze on the base. The sherd probably dates to the Medieval period. The fabric is quite hard. The surfaces are an orange colour whereas the core is a mid grey colour. The sherd weighs 11.9g and is slightly abraded.[6]

WAW-0507B7 - Seven body sherds from various vessels in grey fabrics. No diagnostic or datable features are present. The sherds date to either the Roman or Medieval period and perhaps the Medieval period is most likely. The sherds weigh 72g and are slightly abraded.[7]

WAW-389A95 - Post medieval copper alloy coin.[8]

WMID1683 - The item has a leaf shaped blade which at the tip forks. Leading to the fork is a short deep triangular groove as decoration. The edges of the item on one side have incised notches. In the centre of the item is a single ring and dot as decoration. Towards the upper edge on the side edges there are four small incomplete protrusions which may have formed two lugs either side of the item. Towards the upper edge of the nail cleaner, it becomes more thick as there are two layers of

copper alloy which are held together by a rivet which is flattened at both ends. At the top edge is a loop which is set perpendicular to the blade. This loop as iron remains in it. The blade is folded so the item forms a 'U' shape.[9]

WMID857 - A long narrow item. One end tapers into a sharp point. The opposite end has mouldings. The terminal is a small 'spoon-bowl' like shape/ Below this is a very small hole. There appears to be a rectangular openwork which has been twisted and broken. Decoration is incised, consisting of a herring bone design. H.G. is inscribed on the item, and MB (ligatured) has been stamped on the item. The item is bent in an 'L' shape.[10]

WSM47182	Crash site of an Handley Hampden AD935, Wickhamford	Monument

**Monument Types and Dates**

AIRCRAFT CRASH SITE (20TH CENTURY AD - 1901 AD to 2000 AD)  
 Evidence DOCUMENTARY EVIDENCE

**Description**

Crash site of an Handley Hampden serial number AD935 of 83 squadron on the 14th August 1941 at 12:40. The aircraft was engaged in a 'local night flying exercise'. The pilot flew to a house where his wife was living and carried out unauthorised low flying, eventually hitting a tree and crashing into an orchard. The pilot and navigator were killed with the gunner escaping with injuries. No evidence apparent on ground. Orchard had been cleared by the time of D Griffith's visit in the early 1980's. A metal detector sweep of the field which unearthed only small fragments of alloy. [1]

HER Number	Site Name	Record Type
WSM51001	Site of Outfarm east of Lower Farm, Wickhamford	Monument

### Monument Types and Dates

OUTFARM (19TH CENTURY AD to 20TH CENTURY AD - 1801 AD to 1970 AD?)

SHELTER SHED (19TH CENTURY AD to 20TH CENTURY AD - 1801 AD to 1970 AD?)

Evidence CARTOGRAPHIC EVIDENCE

PUMP (20TH CENTURY AD - 1901 AD? to 1920 AD?)

Evidence CARTOGRAPHIC EVIDENCE

### Description

Site of outfarm east of Lower Farm, Wickhamford. Demolished 19th century (?) unlisted outfarm. Loose courtyard with a single side of the courtyard formed by working agricultural buildings. Isolated location.[1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement.[3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement.[4][5]

Working building(s): 19th century (?) [6]

2nd Edition Ordnance Survey map appears to show an open fronted shed. The enclosed yard is divided into two and there is a pump just outside. Structure still present on 1960s mapping but yard is not shown. Possibly a field shelter for livestock? Dates are conjectural.[7][8][9]

FARMSTEAD (19TH CENTURY AD to 21ST CENTURY AD - 1801 AD to 2050 AD)

### Description

Field Farm/Orchard Court (Field Farm), Wickhamford. Partially extant 19th century (?) unlisted farmstead with converted buildings. Regular courtyard with multiple yards. Prominent L-plan regular courtyard in association. The farmhouse is detached with side on to the yard. There has been a partial loss (less than 50%) of traditional buildings. Isolated location. Large modern sheds are located on the site. [1][2]

West Midlands Farmsteads and Landscapes Project Regional Statement [3]

Worcestershire Farmsteads Guidance: Part 1 Farmsteads Assessment Framework and Part 2 Worcestershire Farmsteads Character Statement [4][5]

Farmhouse: 19th century (?) Working building(s): 19th century (?). Brick. Planning application submitted in 2005. Appears partially converted on Google Earth [6]

Pig sties visible on 2nd Edition map only. Other outbuildings and possible lean-to extensions shown. Building perpendicular to southern yard was timber framed, Ordnance Survey 1st Edition map shows this shaded which usually denotes a timber framed building.[7][8]

HER Number	Site Name	Record Type
WSM56965	Milestone, Pitchers Hill, Wickhamford	Building

### Monument Types and Dates

MILESTONE (Built, (at some time) 18TH CENTURY AD to 21ST CENTURY AD - 1701 AD to 2050 AD)

Evidence	PHOTOGRAPHIC EVIDENCE
Main Building Material	METAL

### Description

Milestone society records obtained in 2013 indicate the milestone is located on the verge of the A44 Pitchers Hill, Southeast of Bond Industrial Estate. The milestone had been surveyed and photographed in 2011 and shows it is in a moderate condition with some rusting on the metal post. [1][2]

The milestone is clearly visible from the road on Google Streetview. [3][4]

HER Number	Site Name	Record Type
WSM56984	Ridge and furrow south-west of Field Farm, Wickhamford	Monument

### Monument Types and Dates

RIDGE AND FURROW (MEDIEVAL - 1066 AD to 1539 AD)

Evidence	EARTHWORK
Evidence	LiDAR EVIDENCE

### Description

Ridge and furrow earthworks visible on LiDAR coverage. Running approximately north-south, varying widths and curving at the northern end. Part of earlier field system. Ordnance Survey 1st Edition map shows the current field boundaries and shows that this field pattern results from the inclosure of medieval open fields. The LiDAR coverage also reveals earlier boundaries and headlands in the ridge and furrow.[1][2][3]

### Monument Types and Dates

RIDGE AND FURROW (MEDIEVAL - 1066 AD to 1539 AD)

Evidence	EARTHWORK
Evidence	LiDAR EVIDENCE

### Description

Ridge and furrow earthworks visible on LiDAR coverage. Running approximately north-west to south east, perpendicular to surrounding fields, where ridge and furrow is still visible. Part of a much larger medieval field system, largely ploughed out, in the area. Field boundaries on the Ordnance Survey 1st Edition map show the boundaries respect the earlier field system in places. Also visible in aerial photographs.[1][2][3][4]

Civil Parish Wickhamford, Wychavon, Worcestershire

**Description**

One archaeological deposit was encountered during the watching brief, a narrow, stone-packed trench which appears to be a land drain of a type common in the eighteenth century, though an earlier date of construction is potentially the case. Finds recovered from the pipe-trench were modern and post-medieval. A flint core was recovered from 5m to the west of the pipeline, to the north of Murcot Road.[1]

Civil Parish	Hinton on the Green, Wychavon, Worcestershire
Civil Parish	Wickhamford, Wychavon, Worcestershire

---

**Description**

Clause 69 of the Evesham Charter S.1599 refers to a Military Way/Army Road. Grundy provides a translation under Clause 65 of his Second Evesham Charter ([1], p.106) and Hooke under S.1599 ([2], p.416). Details of the charter can also be found in Finberg under F.379 ([3], p. 134) and in Sawyer under S.1599 - Bounds Only [4].

The same landmark is also referred to in Clause 9 of the Bengeworth Charter S.1590. Grundy provides a translation under Clause 8 of K.1358 ([1], p.26) and Hooke under S.1590 ([2], p.375). Details of the Boundary Survey can also be found in Finberg under F.369 ([3], p.133) and Sawyer under S.1590 - Bounds Only [4].

The same landmark is also referred to in Clause 11 of the Bengeworth Charter S.1664. Grundy provides a translation under K.1299 ([1], p.25) and Hooke under S.1664 ([2], p.345). Details of the Survey can also be found in Finberg under F.332 ([3], p.125) and Sawyer under S.1664 - Bounds Only [4].

Grundy locates the road as being aligned with the present A44 but Hooke locates it as part of the newly discovered Roman road running north-east from Hinton on the Green, specifically a short stretch to the south-east of Porter's Plantation. The perambulation renders Grundy's location very dubious so Hooke's has been preferred. The existence of the road was conjectured in 1975 [5].

---

**Description**

The watching brief was undertaken between the 17th January and the 2nd of February 2011 and comprised of the monitoring of the removal of topsoil and subsoil. No features of archaeological interest were encountered within the monitored area and no artefacts were recovered. Slight variations on the subsoil within the field may be attributable to past ploughing, although the size of the drive and reception pits were not large enough to explore this interpretation fully.

No archaeology was uncovered, however this is most likely the result of the small scale of excavations rather than an absence of archaeological activity. The surrounding area is known to be a rich resource of heritage assets and any future development should take this in to account. No further work is recommended in respect of this development. [1]
